

Recommendation letter

To Whom It May Concern,

I would like to wholeheartedly recommend Ábel Nagy and Barnabás Gőz, the developers of a highly impactful and professionally executed mobile application created specifically for the Budapest Model United Nations (BIMUN) conference. Their initiative, technical expertise, and reliability make them outstanding partners for any MUN event seeking digital innovation and enhanced participant experience.

What makes their work particularly remarkable is that the development of the application was entirely self-initiated. Without external prompting, Ábel and Barnabás identified key logistical and communication challenges faced during MUN conferences and took the initiative to build a solution from the ground up.

Their app enabled instant notifications to delegates and organizers regarding urgent updates, room changes, or scheduling shifts—resolving one of the most common pain points of any large-scale event. They also implemented digital badges, allowing for seamless and secure check-in and identification, enhancing both convenience and security.

Additional features like live agendas and committee info contributed to a smooth user experience throughout the conference.

The impact on BIMUN was immediately visible. Over 93% of participants downloaded and actively used the app, and we received overwhelmingly positive feedback regarding its ease of use, intuitive design, and helpful functionalities. Many attendees mentioned that the app significantly improved their experience and made the event feel more cohesive and professionally managed.

Working with Ábel and Barnabás was a smooth and efficient process. Communication was always fast, clear, and solution-oriented. They consistently demonstrated a strong sense of responsibility and flexibility, adapting the app to our specific needs while maintaining a high standard of technical execution.

In short, the application developed by Ábel Nagy and Barnabás Gőz made a measurable difference in the quality of BIMUN. I have no doubt that any conference or organization considering working with them will benefit greatly from their talent, dedication, and collaborative spirit.

Should you require any further information, please do not hesitate to reach out.

Sincerely,
Tünde Holik
Mentor of Bimun
